

QUANTIFIERS

Read again an extract from Turing's biography. Choose the correct option.

In 1912, *much/many* years ago, Alan Turing was born in the UK. He is known for *a lot/a lots* of things, but primarily for being a mathematician and computer scientist. Back then, there wasn't *much/many* info on computers. But he provided *some/few* definitions such as algorithm and computation. Alan had very *few/a few* friends. His closest *one/ones* was Christopher Morcom, but he died abruptly. This brought him *much/many* sorrow.

Alan and Christopher's mom, Frances, kept in touch by exchanging *loads of/lots of* letters. In those, he explained how he now thought there was *any/no* god. And how Christopher introduced him to new science studies and said he was his inspiration. Now, he had *little/less* free time as his coping mechanism was to work non-stop.

Alan didn't have *no/any* family of his own to take care of, so he got busy and found his way into cryptanalysis during WWII. He decoded *lot of/lots of* Nazi secrets. However, for *much/many* years he had *none/no* recognition because these activities were kept as secrets from the public. His contribution was *too/enough* important that he is believed to have shortened the war in Europe by more than 2 years and saved over 14 million lives.

QUANTIFIERS

Complete the information with the missing words from the list.

LARGE QUANTITIES

He did _____ of things in the scientific field. (formal)

He did _____ of things in the scientific field. (informal)

He worked _____ hours per day.

His death brought him _____ sorrow and pain.

loads

much

lots

many

SMALL QUANTITIES

He had very _____ free time, and after Chirstopher's death even _____.

Alan had very _____ friends. / Alan had _____ friends.

less

much

little

a few

ZERO QUANTITY

He believed there was _____ god.

He did not have _____ faith in _____ after his first love passed away.

anything

any

no
