- 4 In Game B, the game starts if you press the button.
- 5 In Game A, if you swipe the screen, you go more slowly.
- 6 In Game B, if you tap the screen, you go through a tunnel.

Our favourite websites

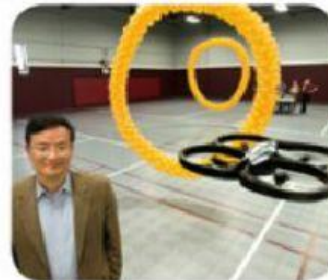

Newsround by Kayla

If you want to find out what's happening in the world, this is the website for you!

It's got new articles every day about life in the UK and the rest of the world. There are four sections: news, sport, entertainment and animals. There are great photos, videos and quizzes, too.

My favourite part of the site is the news section. There are lots of science stories. This week, I read about an invention by Bin He, a professor at the University of Minnesota. It's a mini-helicopter that you can control with your brain. The controller wears a cap which sends electric currents from the brain to the computer. The computer then sends the commands to the helicopter.

In the future, scientists want to use this technology to help people who can't move easily. Isn't that amazing?

My rating: ★★★★★

Tate Kids by Rupert

Do you love drawing, painting, making films or just looking at art? If you do, visit the Tate Gallery's website for kids. It's fantastic!

One section explains how to make things like sculptures and masks. There's also a gallery where you can upload your own pictures.

My favourite part of the website is the games section. They add new games all the time. In one game called *Airbrush*, I painted a picture by waving my hand in front of a webcam. First, I had to turn on the webcam. Then I had to choose a paintbrush and a colour. After that, I moved my hand in different directions to make a picture. You can jump up and down to make a picture, too. It was really fun!

My rating: ★★★★★

A. Choose True or False.

- | | | |
|--|------|-------|
| 1. Kayla can read articles about live in the US. | True | False |
| 2. There are more than four sections in Newsround website. | True | False |
| 3. Kayla enjoys the news section because there are lots of science stories. | True | False |
| 4. Bin He invented a mini-helicopter that you control with your eyes. | True | False |
| 5. You need a computer to send commands to the helicopter. | True | False |
| 6. Rupert likes Tate Kids because it is a website about art. | True | False |
| 7. Rupert can not upload pictures. He can only see them. | True | False |
| 8. You can paint a picture just by waving your hand in front of a webcam in the game Airbrush. | True | False |

B. Read the definitions and match the definitions with the words.

- | | |
|---|---------------------|
| 1. A set of pages of information on the internet about a particular subject, published by a single person or organization | • sculptures |
| 2. These are movements of electricity. | • Cap |
| 3. This is a piece of art made of wood or stone. | • Article |
| 4. This part of the body controls the rest of the body. | • Electric currents |
| 5. This is something you wear over your face. | • Website |
| 6. This is a piece of writing in a newspaper or on a website. | • Brain |
