6.3.2 Complete sentence/ paragraph with word from the box below

balance	ledgers	entry	outgoings	transaction	credit
entries	profit	income	debit	sources	

Double (1) bookkeeping is a system which enables the business manager to record all the money coming in (2) and all money going out (3)....., and to work out the company's progress and present position. For every (4), there are two (5) in the ledgers. In one ledger, it is shown on the (6) side, and in the other, as a (7) Each ledger records transaction of a particular type. By adding the transactions for a period of time, you find the amount needed to balance the account. All the balances from the different (8) are added together in the trial balance. If everything has been entered correctly, their total must (9) – that is, they must be equal. The bookkeeper can go on to prepare the (10) and loss account and finally the balance sheet, which shows the state of the business on the date it was drawn up. You can see at the glance the (11) and use the funds.
