

Ain't No Doubt About It

Canción de Meg Donnelly y Milo Manheim

It's you and me for the rest of our lives together

We're not breaking up, we're not falling out

We won't change (I hope)

Living perfectly, so happily, 'til forever

When it comes to trust

There's nothing that we can't say (I hope)

We're not worried / bored

Definitely not worried at lot / all

So disturbing

How all of these stars align (like, how?)

We're not nervous / shy

And totally unconcerned with

Things uncertain (and there's a lot)

We're gonna be fine, so fine / time

Ain't no doubt about it

It's working out right, all night / all right

All I'm thinkin' 'bout is

How everything's gonna be okay

No complications in our way / stay

It's fine, we're fine

Ain't no doubt about it

Honestly, if you're asking me, we're not crazy

Yeah, we're old enough to know we're in love

That's no lie (but we're 17)

If you promise me that we'll always be on the same page

Then I promise, too

I'll be choosing you every time (every-every time?)

We're not worried

Definitely not bored / worried

So disturbing

How all of these stars align

We're not nervous / shy

And totally unconcerned with
Things uncertain

We're gonna be fine, so time / fine
Ain't no doubt about it
It's working out right, all right / all night
All I'm thinkin' 'bout is
How everything's gonna be okay
No complications in our stay / way
It's fine, we're fine
Ain't no doubt about it

It's all going according to plan
It's all falling right into our hands
Nothing to it, let's get it moving, moving
Find the map and be on our way home
We'll be leaving here before you know
With what we needed
Mission completed

We're not worried
Definitely not worried
So disturbing
How all of these stars align
We're not nervous
And totally unconcerned with
Things uncertain (this isn't gonna be good)

We're gonna be fine, so fine
Ain't no doubt about it
It's working out right, all right
All I'm thinkin' 'bout is
How everything's gonna be okay
No complications in our way
It's fine, we're fine
Ain't no doubt about it
