### Each Slide Represents an ATOM!

**Protons = Black Dots**

**Neutrons = Blue Dots**

**Electrons = Number written below the atom label (A, B, C, etc.)**

### An Atom can be classified as an:

**Isotope** –has a mass that doesn't match the rounded Periodic Table mass

**Ion** – atom with an unequal number of PROTONS & ELECTRONS

**Stable** – atom with equal PROTONS & ELECTRONS and also has a mass that matches the rounded mass from the Periodic Table

**\*The mass of an atom is the SUM of its PROTONS & NEUTRONS.**
