

Division Word Problems

Answer the following questions -

1. The class has 28 students sitting in 4 rows. How many students are in each row?

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

2. Angel made 36 idli. He could only put 9 idli on each pan. How many idli pans did Angel use?

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

3. Minu had 40 pencils. She divided them into groups of four. How many pencils she put in each group?

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

4. A Restaurant served 32 cup cakes. If 8 customers ate an equal number of cup cake, how many cakes did each person ate?

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

5. Ritu found 42 marbles at her box. She gave the equal number of marbles to 7 of her friends. How many marbles did each friend gets?

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$
