YOU WILL READ A SHORT REVIEW OF A RESTAURANT.

MOSO- MOSO

I (went – tried - tested - proved) Moso Mosos for the first time this month, and (revealed - noticed - found - knew) that it was easily the best Chinese restaurant I've eaten in.

The surroundings were modern , yet it (then - already - even - still) felt airy and cosy. The waiters were very friendly and informative , and not (too - much - more - enough) busy, as is often the (reality - case - situation - fact) in some of the city's more popular restaurants.

As I was eating with a party of eight, we (achieved - succeeded - managed - reached) to sample a good range of items on the menu, and between us couldn't find a single item that wasn't satisfying and delicious. Every (plate - dish - food - meal) featured wonderful combinations of flavours. All the ingredients were clearly (fresh - new - recent - best) and of the highest quality, and in my opinion, the seafood was particularly (tasteful - tasty - charming - special). We felt that we were given very good (price - worth - cost - value) for money, because the meal came to about \$10 per person which we thought was very reasonable.

All of us would highly (recommend - propose - suggest - advise) this restaurant and , as it is located (hardly - almost - exactly - just) a short walk from our workplace, we will no (chance - problem - doubt - likelihood) be back for many more lunches.
