

## GRAMMAR: PAST MODALS OF DEDUCTION 1

Listen to the people answering the question "What do you think Stonehenge was built for?", and fill in the gaps.

a

The big stones \_\_\_\_\_ like a \_\_\_\_\_. The shape is very similar to those found in Japan at the entrance of some of our \_\_\_\_\_. I think it \_\_\_\_\_ have been a kind of \_\_\_\_\_, a \_\_\_\_\_ place.

**STONEHENGE**

b

Well, apparently, the \_\_\_\_\_ are aligned with the \_\_\_\_\_ and the \_\_\_\_\_ at certain times of the year – the solstices and the equinoxes. So I think it \_\_\_\_\_ have been a kind of prehistoric \_\_\_\_\_. But it \_\_\_\_\_ have only been a calendar.

It was more important than that.

I think Stonehenge \_\_\_\_\_ have been a place where people worshipped the \_\_\_\_\_ and the Moon.

c

I think it \_\_\_\_\_ have been a place where important \_\_\_\_\_ took place. It probably had a roof on it originally – if you think about it, it \_\_\_\_\_ sense. It was obviously an important place, and it \_\_\_\_\_ a lot around here.

d

We don't know, do we? It \_\_\_\_\_ have been a landing site for \_\_\_\_\_ from other \_\_\_\_\_, for all we know. Some people \_\_\_\_\_ it was. Personally, I think it's just a bunch of \_\_\_\_\_ in a field.

e

Well, it's a mystery, isn't it? Even the archaeologists can't agree. There's one group who have dug up \_\_\_\_\_, and they think they can prove that it \_\_\_\_\_ have been a cemetery. Then there's another group of archaeologists who think that the \_\_\_\_\_ have had special \_\_\_\_\_, and that's why they brought them all the way from Wales. Personally, I think it \_\_\_\_\_ have been a kind of \_\_\_\_\_ place.
