

### Activity 1.1.6

Identify the malware used in the following cyberattacks.

1. Malware designed to track online activity and capture data \_\_\_\_\_
2. Software that automatically delivers advertisements \_\_\_\_\_
3. Malware that holds a computer system captive until payment is made to the attacker  
\_\_\_\_\_
4. Malicious code attached to genuine programs and usually spreads by USB drives,  
emails or network shares \_\_\_\_\_
5. Malicious code that replicates itself independently by exploiting vulnerabilities in  
networks \_\_\_\_\_
