4) How are they going to find a better texture?
5) What do they need to start manufacturing their products on a greater scale?
6) What do the expressions in bold mean? You can read the examples below to see the context in which they are used in the video

CULTURE

"We culture meat, we basically grow animal meat without killing the animal

FEASIBLE

"As far as using that to manufacture food to feed the world that is way too slow for that to ever be feasible"
