

LOS POLIEDROS

Identificamos los poliedros y sus elementos

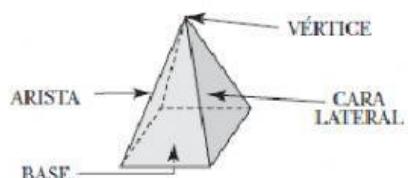

Los poliedros son cuerpos geométricos que tienen todas sus caras planas (polígonos).

PRISMAS

Los prismas tienen dos bases y sus caras laterales son paralelogramos.

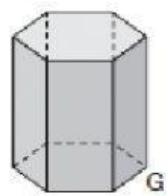

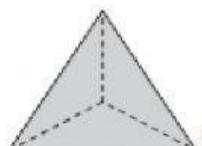

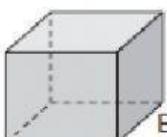

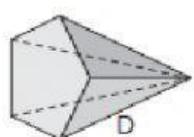

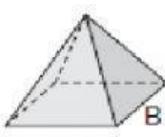

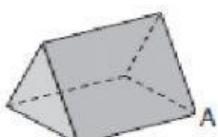

PIRAMIDES

Las pirámides tienen una base y sus caras laterales son triángulos.

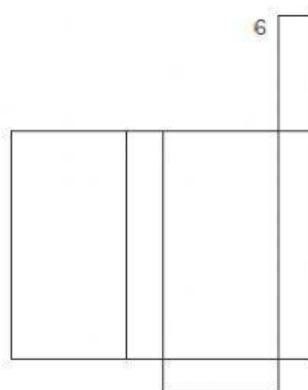

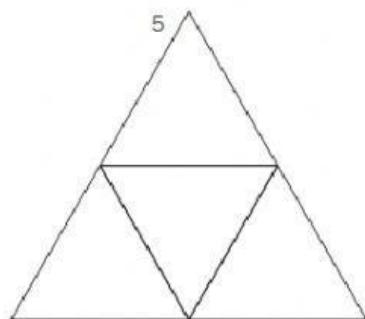

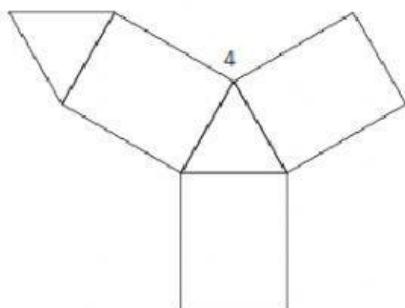

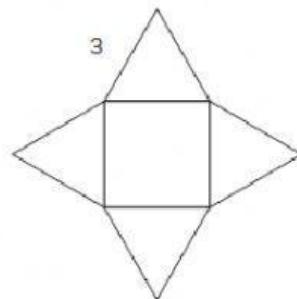

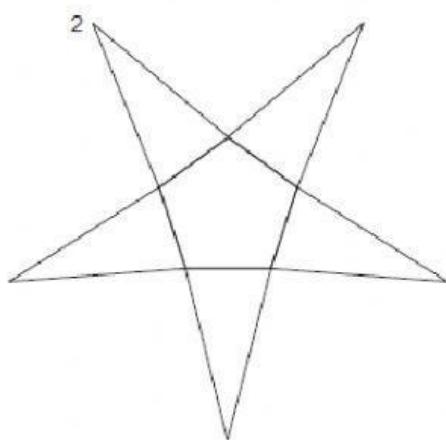

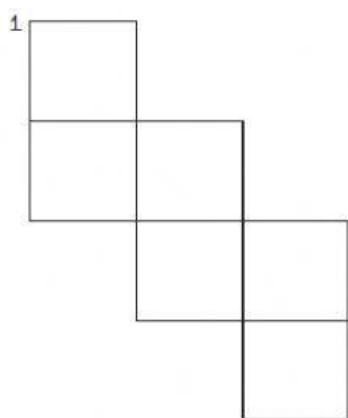

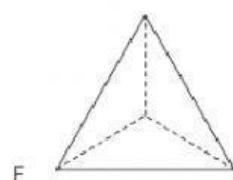

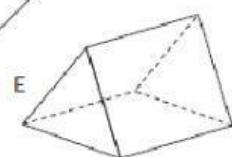

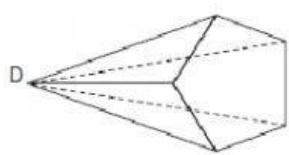

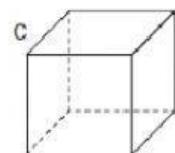

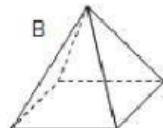

APLICO LO APRENDIDO

Cuenta el número de caras, vértices y aristas que tiene cada poliedro y completa la tabla.
