

L.Q. Can I subtract using a formal method?

1.)
$$\begin{array}{r} 715423 \\ - 597464 \\ \hline \end{array}$$

2.)
$$\begin{array}{r} 604635 \\ - 326690 \\ \hline \end{array}$$

3.)
$$\begin{array}{r} 937054 \\ - 79486 \\ \hline \end{array}$$

4.)
$$\begin{array}{r} 1000000 \\ - 652054 \\ \hline \end{array}$$

Write the following in your book, using column subtraction.

*Remember to use the correct place value columns:

5. $34,200 - 18,537 =$

6. $2,924,417 - 652,738 =$

7. $700,000 - 15,743 - 8,054 =$

EBI: Use the steps to success booklets on your table to create instructions, with a partner, for how to subtract the given calculation.
