Wolves in Yellowstone Park

Wolves were exterminated in Rocky Mountains because they **1** _____ people and ate livestock. This led to some **2** _____ consequences. For example, there was a considerable rise in the number of a type of large **3** _____ in Yellowstone National Park. This led to the extinction of a particular species of **4** _____. So wolves were re-introduced to the Park in order to restore the balance of its **5** _____. However, now a **6** _____ has written a paper showing the situation is more complex than was previously thought. Other factors such as **7** _____ have an impact on the situation. Changes in the **8** _____ of some species have had a negative effect on their numbers. The **9** _____ in the number of beavers, for example, has been particularly harmful for the Park. In other words, wolves were not, as once believed, the only cause of the problems in the area.
