Part Two. In the rest of this section you will read a passage. It is followed by several questions about it. You are to choose the one **BEST** answer to each question. Answer all the questions following the passage on the basis of what is **STATED** or **IMPLIED** in this passage.

A new atomic clock being developed for navigation satellites will perform better than previous devices. The clock, which incorporates a hydrogen maser, will use new microwave cavity design to provide a compact and lightweight package, and new electronic techniques to maintain long-term stability. The clock can provide precise navigation information because it is stable to one second in three million years. The differences in the time when signals from four satellites arrive at one location can be used to calculate that position to within a few yards.

7. From the passage it can be inferred that which of the following characteristics of the clock mentioned will be the most impressive?
1. its compact size
2. its weight
3. its accurateness
4. its ability to measure distance
8. It can be inferred from the passage that the new clock will be
1. long-lasting.
2. harmful to humans.
3. produced in great numbers.
4. very attractively looking
9. According to the passage, signals from how many satellites will be used to calculate a position?
1. 1
2. 2
3. 3
4. 4
10. What is the primary concern of the passage?
1. To teach a lesson
2. To sell a product
3. To support a theory.
4. To provide information.
