

## BIOMES FROM NORTH TO SOUTH\_ TEST 1

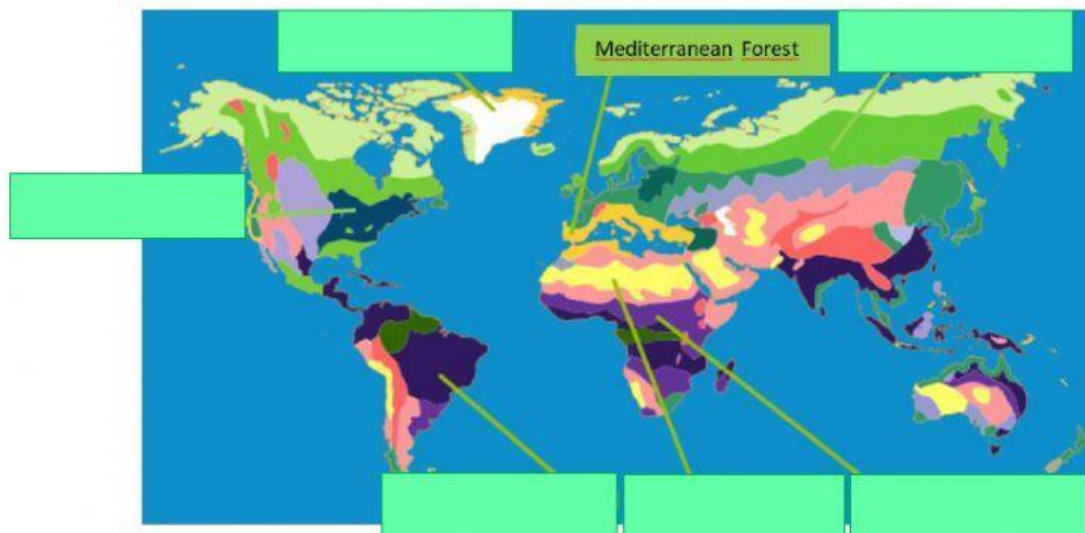

### 1- Complete:

temperature	biomes	characteristics
-------------	--------	-----------------

The Earth's large geographical areas with similar climatic conditions are \_\_\_\_\_. The animals and plants that live there also have some similar \_\_\_\_\_. Differences between biomes depend on the \_\_\_\_\_ and rainfall.

### 2- Complete:

COLD DESERT	HOT DESERT	TAIGA
RAINFOREST	OCEANIC FOREST	SAVANNAH

## BIOMES FROM NORTH TO SOUTH\_ TEST 1

3- Complete:

COLD DESERT	HOT DESERT	TAIGA
RAINFOREST	OCEANIC FOREST	SAVANNAH
MEDITERRANEAN FOREST

## BIOMES FROM NORTH TO SOUTH\_ TEST 1

4- Complete:

CHARACTERISTICS	BIOMES
Land covered with snow. Little vegetation. Sea animals and plants.	
Few trees but abundant grass. Animals migrate in the warmer months. Summer 28°C Winter 25°C	
Little vegetation. Plants with spines. Nocturnal animals.	
Evergreen trees. Plants compete for light. Animals camouflage but birds have bright colours.	
Conifer forest, moss and lichens. Grass in the clearings. Animals migrate during the coldest months.	
Plants have small, hard leaves to retain moisture in the dry season. Animals migrate in winter.	
Deciduous trees. Animals store fat and hibernate or migrate during the cold winter months.	

Well done!
