How to use a two-tube washing machine

Material: two tube washing machine,

Here is how to use a two-tube washing machine:

1. Enter the clothes that have been separated before.
 2. Put water back in and repeat the wash cycle 2 times to remove any residue from the detergent.
 3. Fill the washing tub sufficiently. The volume of water can be determined by how many clothes are washed. Water filling can be done manually using a bucket or scoop, or can also flow water with a hose into the tube.
 4. After the drying time is finished, open the drum and take out the laundry. Dry the laundry in the sun.
 5. After that, set the washing time with the available panels. Determine the washing time by turning the timer panel on the washing machine. Adjust the washing time according to the amount of laundry and type of laundry.
 6. After the washing time is over, drain the water by turning the existing drain panel.
 7. Add enough detergent. Let the detergent mix with water evenly.
 8. After the residue is gone, and the clean clothes drain the water and transfer the laundry to the drying drum. Close the drum and adjust the drying time by turning the dryer panel.
-
