Compare fractions

- * Rule 1: When comparing two fractions with *the same denominators*, then the _____ the numerator is, the greater the fraction is.

Example: Compare $\frac{5}{8}$ and $\frac{3}{8}$.

- * Rule 2: When comparing two fractions ($\frac{N1}{D1}$ and $\frac{N2}{D2}$) with *the different denominators*, then

❖ Step 1: **Multiply** $D2$ to both $N1$ and $D1$ to get _____.

Multiply $D1$ to both $N2$ and $D2$ to get _____.

- ❖ Step 2: Compare the NEW _____ since they have the same denominator ($D1 \times D2$).

Example: Compare $\frac{3}{4}$ and $\frac{2}{7}$.

DO NOW!

1. Use "<,>, or =" to compare fractions.

(1) $\frac{1}{6}$ _____ $\frac{4}{6}$

(2) $\frac{5}{8}$ _____ $\frac{7}{8}$

(3) $\frac{6}{12}$ _____ $\frac{3}{12}$

(4) $\frac{3}{4}$ _____ $\frac{1}{4}$

(5) $\frac{6}{7}$ _____ $\frac{3}{7}$

(6) $\frac{10}{11}$ _____ $\frac{1}{11}$

(7) $\frac{6}{10}$ _____ $\frac{7}{10}$

(8) $\frac{7}{11}$ _____ $\frac{1}{11}$

(9) $\frac{5}{9}$ _____ $\frac{1}{9}$

(10) $\frac{3}{6}$ _____ $\frac{2}{3}$

(11) $\frac{3}{5}$ _____ $\frac{4}{8}$

(12) $\frac{1}{2}$ _____ $\frac{3}{6}$

(13) $\frac{2}{10}$ _____ $\frac{2}{5}$

(14) $\frac{5}{6}$ _____ $\frac{5}{12}$

(15) $\frac{4}{6}$ _____ $\frac{4}{8}$

(16) $\frac{1}{3}$ _____ $\frac{1}{12}$

(17) $\frac{1}{2}$ _____ $\frac{1}{9}$

(18) $\frac{1}{2}$ _____ $\frac{2}{8}$

(19) $\frac{3}{5}$ _____ $\frac{8}{9}$

(20) $\frac{6}{9}$ _____ $\frac{4}{5}$

(21) $\frac{3}{9}$ _____ $\frac{2}{5}$

(22) $1\frac{3}{6}$ _____ $\frac{2}{3}$

(23) $\frac{3}{7}$ _____ $\frac{25}{3}$

(24) $2\frac{5}{6}$ _____ $3\frac{2}{3}$

(25) $\frac{35}{9}$ _____ $\frac{28}{9}$

(26) $1\frac{1}{4}$ _____ $1\frac{3}{8}$

(27) $1\frac{2}{6}$ _____ $1\frac{3}{7}$
