

## Reading

A |  Read and listen.

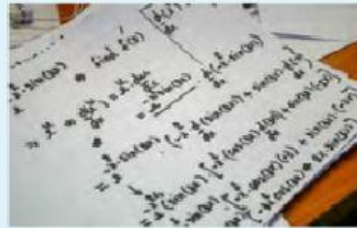

### Amazing profiles

Do you remember what you liked to do when you were seven?

You probably liked playing with your parents and friends. Well, Akrit Pran Jaswal was performing his first surgery. He wasn't a doctor at the time, but he was already considered a medical genius. He started medical school at 12, and by age 17, he was pursuing a master's degree in applied chemistry. He is India's youngest physician and university graduate.

Kim Ung-yong may be the smartest person alive today, and he's been impressively smart since he was three years old. His IQ is 210. At age three, he was studying physics at Hanyang University. At four, he was able to read in several languages. At five, he was able to solve complex calculus problems. He got his PhD in physics at Colorado State University before he turned 15. He is now a professor at Shinhan University in South Korea.

Akim Camara is a violin prodigy. He started playing the violin when he was two. He was still in diapers and had just started talking. When he started lessons, his teacher said that he had an amazing natural ear for music. He learned to play after only six months of training! His first performance was at age three at a Christmas concert. Today, Akim is in his 20s and is still playing the violin.

B | Read the sentences. Choose the correct person.

- |   |  |
|---|--|
