

We are going on a trip

My name is Antony. I am twelve years old. I live in London. Today we are going to travel, me, my parents and my little sister Marianne.

We are at the airport to fly to Barcelona in Spain!

I love traveling by plane. I have already travelled by plane. I flew to Rome, Italy, two years ago. For Marianne it is the first time she is going to take a plane and she is afraid.

In Barcelona we are going to stay in an apartment near the beach. My parents are going to rent bikes to visit the city. We will visit the famous Sagrada Familia, a cathedral designed by the architect Gaudi, we will walk in Park Güell and taste the local food. I also want to go to the zoo and the aquarium. My sister prefers to go to the beach to swim and build sandcastles. We

are going to stay for a week in Barcelona.

I hope there will be a lot of sunshine. I don't like rain, especially during the holidays.

Answers true (V), false (F) or we don't know (?)

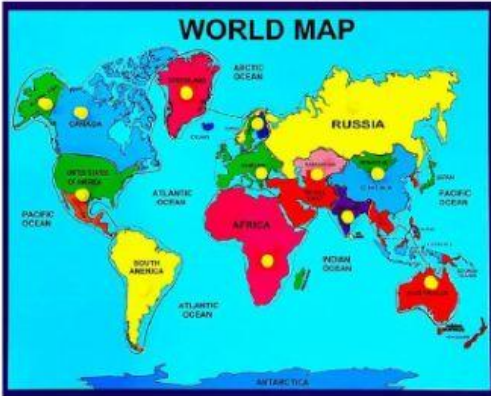

1. Antony has already travelled a lot.
2. He is going to travel with his family.
3. He is at London airport.
4. Her sister doesn't like travelling by plane.

8. What do you like to do during the holidays?
9. Would you rather spend your holidays on the beach or in the mountains?
.....
10. Do you prefer summer or winter holidays?.....

Always look at both sides!

A father was working from home. It was Saturday. He had an important project which he had to finish before Monday morning. His wife was out shopping. His daughter was at home. She came into his study and she wanted attention. She kept asking her father questions and telling him about what she was doing. He just wanted to do his work! He had an idea. There was a magazine on the bookshelf. He looked through it and tore out one page which had a map of the world on it. He then cut the page into pieces and told the little girl to go to her room and put them back together to make the map of

the world again. He was sure she would take the whole morning to do it. He got back to his project. However, ten minutes later, his daughter came back with the perfect map. He was very surprised and a little disappointed. He asked her how she did it so quickly. She explained that there was a picture of a man's face on **Decide if the statements are true or false and then answer the questions in full** le
 to play.

- a. The man was doing his shopping.
- b. He was in the garden.
- c. It was at the weekend.

- g. She asked him lots of questions.
- h. He answered her questions happily.
- i. He got hold of a magazine.
- j. He gave her the magazine.
- k. He gave his daughter a task.
- l. He sent her to her room.
- m. She completed the task quickly.
- n. He was delighted.
- o. The little girl looked on the other side of the page.
- p. Her mother returned from the shop.

1. What was the man doing?

2. Where was his wife?

3. Who came into his study?

4. What was his problem?

5. Where was the magazine?

6. Where did he send his daughter?

Reflections/lessons/morals/messages:

There is always a different side to whatever you experience in this world.
 Whenever you come across a challenge, look at it from a different viewpoint.

Worms are yummy!

Insects are very small animals. They can be spiders, bugs, or **worms**. In many parts of the world, people eat insects.

Communities in Asia, Africa and South America have insects as a common part of their diet.

Experts say that insects are very healthy and consider meal worms and crickets to be **superfoods** **because** they are a great source of protein and other nutrients.

Insects are much better for the planet than the traditional meat diet. Insects need less land and water. Cows and other animals make gasses that are bad for the environment because they cause the greenhouse effect. Insects make almost none.

Some insects taste like meat. For example, if you steam a **meal worm**, it smells like sweetcorn. If you fry it, it tastes like a shrimp.

Most people from Europe and North America don't like eating insects. They think that they are **disgusting**.

Answer the questions

1. How are insects?

2. Where do people eat insects?

3. What do experts think about insects as food?

4. Why do they consider insects as superfood?

5. Why do experts consider insects better for the planet than a meat diet?

6. What is considered bad for the environment?

7. How do worms taste?

8. What do Europeans and North Americans think about insects?

9. Have you ever eaten an insect? Which one? Where?

10. Would you eat one if you were in a place where people eat insects? Why? Why not?
