HOW TO WASH YOUR HAIR

DRAG	DROP
Put a small amount of shampoo if you have short hair. It will keep your hair healthy, smoother and shiny.	
Lather up the scalp. Because the hair closest to the scalp is the youngest, it is better to wash the hair from the roots to ends.	
Rinse your hair with cold water. this will help your hair shine better and shut the follicles tight.	
First of all, use warm water to rinse your hair. Warm water is good to clean and remove the dirt trapped in the hair.	
Rub your hair gently. Rubbing the hair too harshly may damage it permanently.
