

'When You Breathe'

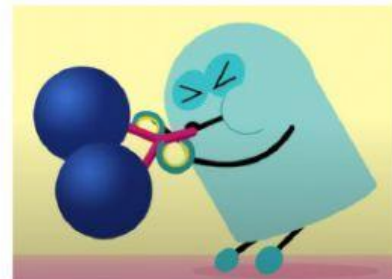

When you
You take
From the air, and into your
And then they spread it to
All the rest of you
From yourto your thumbs,
the Respiratory

Air goes in a flood
From your lungs to your
Through the
That branch out like little trees
What your needs
is for your to breathe
Every second of the
Doo doo doo doo doo dooooo

STORYBOTS

The two in your chest
Allow you to express
To whistle, to and to sing
Like two balloons they fill
Up until
The air goes
Then you can and shout

When you breathe
You get oxygen
And when you
You lose all the air that's stale
What your body needs
Is for your lungs to breathe
Every of the day
Every second !
