

- The Coordinate Plane consists of an _____ that runs horizontally, and the _____ that runs vertically.

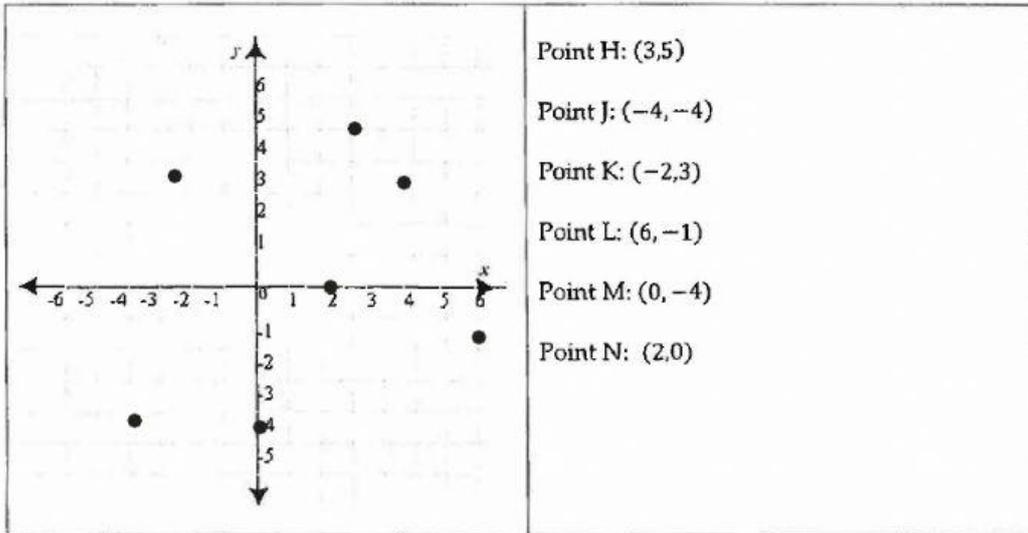

- The origin is the _____ of the coordinate plane, and any point in the coordinate plane is assigned an _____.
- The first number is your _____. Right is the _____ direction, and the _____ is the negative direction.
- The second number is your _____. Up is the _____ direction, and _____ is the negative direction.

Example 1 - Name the ordered pairs that represent the points.

	<p>Point A: _____</p> <p>Point B: _____</p> <p>Point C: _____</p> <p>Point D: _____</p> <p>Point E: _____</p> <p>Point F: _____</p>
--	---

The Coordinate Plane

Example 2 - Plot the ordered pairs on the coordinate plane.

Example 3 - In which quadrant or axis does each point lie?

- Point P: (2,4) _____
- Point Q: (-1, -3) _____
- Point R: (-3, 0) _____
- Point S: (0, 5) _____
- Point T: (-5, 4) _____
