

Jacques Cousteau

Jacques-Yves Cousteau was a French explorer. He was also a diver, a photographer, a scientist and a filmmaker. He is famous for exploring and studying the sea and all forms of life in the water. He discovered many shipwrecks—ships that sank to the bottom of the sea. He also developed the Aqua-Lung. The Aqua-Lung had two tanks with air. Divers used it to breathe underwater.

Cousteau had a ship named *Calypso*. It was also his laboratory. Cousteau was a very good filmmaker, and he made five movies about the sea. He also wrote many books about the sea and the creatures that live in it.

Jacques Cousteau died in Paris on June 25, 1997. He was 87 years old.

Read the information, and match the questions with the correct answer.

Where was he from? ●

What did he write? ●

Where did he died? ●
