

Bài 6: Tìm x :

1) $x + \frac{1}{3} = \frac{3}{4}$

Hướng dẫn giải : $x + \frac{1}{3} = \frac{3}{4}; x = \frac{3}{4} - \frac{1}{3}; x = \frac{9}{12} - \frac{4}{12}; x = \frac{9-4}{12}; x = \frac{5}{12}$ Vậy $x = \frac{5}{12}$.

Điền dấu hoặc số:

2) $x - \frac{2}{5} = \frac{5}{7};$
$$x = \frac{5}{7} + \frac{2}{5}$$

$$x = \frac{25}{35} + \frac{14}{35}$$

Vậy $x =$ _____

3) $-x - \frac{2}{3} = -\frac{6}{7};$

$$-x = \frac{-6}{7} + \frac{2}{3}$$

$$-x = \frac{-12}{21} + \frac{14}{21}$$

Vậy $x =$ _____

4) $\frac{4}{7} - x = \frac{1}{3};$

$$-x = \frac{1}{3} - \frac{4}{7}$$

$$-x = \frac{7}{21} - \frac{16}{21}$$

$$x = \frac{9}{21}$$

5) $x + \frac{5}{2} = -\frac{3}{2};$

$x =$ _____

$x =$ _____

Vậy $x =$ _____

6) $5 - x = \frac{3}{7};$

$-x =$ _____

$-x =$ _____

Vậy $x =$ _____

7) $-x - 2 = \frac{5}{4};$

$-x =$ _____

$-x =$ _____

Vậy $x =$ _____

8) $x - \frac{3}{4} = \frac{7}{6};$

$x =$ _____

$x =$ _____

Vậy $x =$ _____

9) $\frac{5}{4} + x = \frac{2}{3};$

$x =$ _____

$x =$ _____

Vậy $x =$ _____

10) $x - \frac{4}{7} = \frac{3}{4};$

$x =$ _____

$x =$ _____

Vậy $x =$ _____

11) $\frac{1}{2} + x = \frac{5}{3};$

$x =$ _____

$x =$ _____

Vậy $x =$ _____

12) $\frac{4}{5} - x = \frac{3}{2};$

$-x =$ _____

$-x =$ _____

Vậy $x =$ _____

13) $x + \frac{5}{6} = -\frac{1}{12};$

$x =$ _____

$x =$ _____

Vậy $x =$ _____

14) $x + \frac{5}{2} = \frac{3}{2};$

$x =$ _____

$x =$ _____

Vậy $x =$ _____

15) $\frac{3}{4} - x = \frac{5}{6}.$

$-x =$ _____

$-x =$ _____

Vậy $x =$ _____
