### Teens' Time: Susie's blog

1

Listen and read. What kind of bird lives in Susie's garden?

sparrows

### Susie's Nature Blog

Hi, I'm Susie and welcome to my nature blog. I have studied the plants, birds and insects in my garden and I have learnt many interesting things. Read on to see what is in my garden.

This is my favourite tree of all. It's an old apple tree. It has dark green leaves and delicious fruit every year. It doesn't need much watering and it likes a lot of sun. **If you cut** the dead branches every winter, **the tree grows** strong the next year.

This rose bush is in my front garden. Its pink flowers are beautiful and they also smell lovely. I water it every day when it is hot. **If you take** off the dead flowers, **new ones grow** faster. Be careful of the thorns!

The best insects for a garden are bees. Some plants need bees to produce fruit. Bees collect nectar from flowers and they carry pollen from one flower to the next. Last year, we didn't have any bees. I read online that they were sick. **If bees are sick, they don't leave** their hives. But this spring they are back, thank goodness.

There are lots of sparrows in my garden too. They hop about on the grass and they peck the ground for worms and seeds.

These photos weren't easy to take! I had to sit quietly for a very long time. But **if you are patient, you get** good photos.

Next week, visit my blog for information about root vegetables.

Wybierz tytuł od a do e i dopasuj do każdej z czterech części tekstu. Wpisz w kratki 1-4. Uwaga! Jeden tytuł jest dodatkowy!

### 2 Choose the correct titles for the paragraphs. Be careful - there is one additional title.

- a Some facts about my favourite tree. ☐
- b Patience pays off. ☐
- c Those that fly and crawl. ☐
- d How I relax in the garden. ☐
- e Smell that bush! ☐

## Vocabulary
