## A NEW LIFE DOWN UNDER

DAY 1

We came straight from the airport to the farmhouse. It's huge! Our old flat was the opposite of small, but now we have fifteen rooms, including a sports room with a football table! Amazing.

DAY 7

There are only five classrooms at my new school (and a windmill to power the electricity)! I was really nervous at first, but all my classmates were really nice. Well, apart from one boy who laughed at my English pronunciation, but I didn't mind too much. There's always one school idiot!

DAY 10

This time last week, I was living in one of the world's biggest cities. More than 8,000,000 people live in London; almost as many as Tokyo. My new town has got a population of 389! 10 I miss people, skyscrapers and traffic! We don't even have a car here.

25 This morning, Dad offered me a lift to school on the motorbike, but I was too embarrassed. That was a mistake. While I was walking, I saw two scorpions and I nearly stood on a big, black tarantula! In the UK, there were flies and sometimes a few little spiders. Australian insects belong to horror films!

DAY 15

15 We've now got a vehicle. But this isn't good news. When I went outside this morning, Dad and Mum were riding around the farm on an old motorbike! They were laughing like teenagers. They're forty-five.

30 Maybe this move isn't so bad. Yes, it's quiet, the animals are scary, and I'm still not sure about the motorbike. But people are really friendly, and it's hard to be sad when it's sunny every day!
