

EJEMPLO

$$5 \times 4 = 4 \times 5 = 20$$

**PRÁCTICA**

$$9 \times \quad = 8 \times 9 = 72$$

$$2 \times 14 = \quad \times 2 = 28$$

$$12 \times 11 = 11 \times 12 =$$

$$\quad \times \quad = 5 \times \quad = 40$$

$$10 \times \quad = 8 \times 10 = 80$$

$$15 \times \quad = 4 \times 15 =$$

$$17 \times \quad = 3 \times 17 = 51$$

$$\quad \times 9 = 9 \times 6 =$$

$$52 \times \quad = 2 \times 52 =$$

$$5 \times \quad = \quad \times 5 = 15$$
