

Grade 12 General

Teenage Brains MAZE

As we have mentioned, education is more important than ever for 1. (today's , today's , today's) adolescents 2. (but , so , and) in one way, the teenage brain is better prepared for this pressure. This is because the teenage brain is still forming new connections, and a brain that is forming new connections is better able to learn and remember information. 3. (Therefore , However , In contrast ,) a teenage brain can learn and retain more information than an adult brain.

4. (Although , To begin with , On the other hand) , because all the connections within a teenage brain are not yet fully developed, teenagers can find it difficult to focus on future rewards and goals. 5. (As a result , Finally , In contrast) teenagers generally place more importance on instant gratification than on long-term goals. For instance, if you ask an adolescent if they would like 200 dirhams now or 400 dirhams in a month, the majority will choose to have 200 dirhams now. 6. (In conclude , Similarly , However ,) it can be difficult for teenagers to focus on the future rewards of studying hard now.
