

1

Find the multiplier

$$\begin{array}{r} 397 \times \\ \hline 1985 \end{array}$$

Answer:

2

Find the multiplicand

$$\begin{array}{r} \square \square \square \times \\ \hline 1404 \end{array}$$

Answer:

3

Which is the highest digit?

$$\begin{array}{r} \square \square \square \times \\ \hline \square 487 \end{array}$$

Answer:

4

Which is the lowest digit?

$$\begin{array}{r} 2 \square \square \times \\ \hline \square 248 \end{array}$$

Answer:

5

In each case find the sum of the digits of the multiplicand:

$$\begin{array}{r} 2 \square \times \\ \hline \square 1 \\ \hline \square 4 \\ \hline \square 6 \\ \hline 9 \square \end{array}$$

Answer:

$$\begin{array}{r} 6 \square \times \\ \hline \square 1 \\ \hline \square 4 \\ \hline 1 \square 8 \\ \hline \square 34 \end{array}$$

Answer:

$$\begin{array}{r} 3 \square \times \\ \hline \square 4 \\ \hline 1 \square 4 \\ \hline \square 2 \\ \hline 8 \square \end{array}$$

Answer:

$$\begin{array}{r} \square 5 \times \\ \hline 1 \square \\ \hline 425 \\ \hline \square \square \\ \hline \square 27 \end{array}$$

Answer:
