

Propiedades de la potenciación y radicación

radius = 6.8 cm
diameter = _____
circumference = _____
area = _____

radius = _____
diameter = _____
circumference = _____
area = 237.787 m²

radius = _____
diameter = 11.6 cm
circumference = _____
area = _____

radius = _____
diameter = _____
circumference = 44.611 cm
area = _____

radius = _____
diameter = 4.6 m
circumference = _____
area = _____

radius = 5.0 cm
diameter = _____
circumference = _____
area = _____

radius = _____
diameter = _____
circumference = 42.097 km
area = _____

radius = _____
diameter = _____
circumference = _____
area = 30.191 mm²

Calcular la longitud de arco

Radio = 2 mm

$\widehat{AC} =$

Radio = 537 mm

$\widehat{DF} =$

Radius = 5 km

$\widehat{GJ} =$

Radius = 38 m

$\widehat{RT} =$
