Cross – Curricular activities – English and Biology

The Plant Cell

https://es.liveworksheets.com/bb26103fu

1) **Watch the video. Choose the best answer**

How many characters are presented?

5

6

7

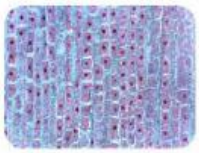

2) **Complete the chart**

CHARACTERS	ORDER in which they appear	COLOUR
Nucleus		
Mitochondria		
Cell wall		
Chloroplast		
Endoplasmic reticulum		
Cell membrane		

3) **Watch the video. Order these lines**

LINES	NUMBER
You know I got the juice	
I'm the nucleus, I run this clique	
I'm the number 1 OG, which is short for Organelle	
Time to introduce	
Welcome to the plant cell	
An envelope has got my back	
So let's meet the family	

4) **Match the lines in BLUE with the correct picture**

So let's meet the family

First up ***the cell Wall***

Here's to tell y'all

I hold the cell up so I don't fall, I stand tall

Keep us shaped up square so we don't look whack

'cuz you know plant cells

Are stacked on stacks of stacks

5) **Choose the correct word**

a) And if ***you / I / they*** wanna get in

b) I maintain, you gotta get ***past / to / at*** me

c) ***What? / Which? / Who?*** The **cell membrane**

d) Regulating what ***comes / goes / gets*** out and goes in

e) Like a door ***man / cell / stack***

f) I'm letting all my ***bros / friends / cells*** in

6) **Order these lines**

LINES	NUMBER
We are the parts of the plant cell	
Making mitosis by the end of the night	
Getting energy from rays of light	
This flow gets growing and we represent well	
We are the parts of the plant cell, yeah!	

7) **Choose the correct option**

Last name: reticulum, first name: endoplasmic

Haven't heard of me? Well, that's tragic

Moving ***proteins / ribosomes / cells*** from one spot to another

They're made by ***proteins / ribosomes / cells***

Slow your roll

8) **Order these lines**

LINES	NUMBER
You're dealing with the chloroplast	
Hand on the mic, I'm in control	
So looks like it's about time to get chill	
Got a nice fat sack of chlorophile	
Sun rays beat down like a sizzle	
No need to move so fast 'cuz now	

Ok now, can I go?

Ok Mitochondria, go for it!

Alright,just need to take a quick breath first

I gotta move quick, I gotta move fast

In the plant cell clique, with Chloroplast we work together, see?

Photosintesys to energy

I make it look easy

I'm the finest MC in the microscopic nation

Take a deep breath, call that cell respiration powerhouse, I power up

My engine drives that flower up

Not bragging, just to tell ya

Zinnia to Azelia, photosynthesis won't fail ya
