Great entrepreneurs

A

Andrew Carnegie was one of the wealthiest businessmen of the 19th century.

Mostly self-taught, he started his career as a messenger boy and telegraph operator. By 1889, however, he had become the proud owner of Carnegie Steel Corporation, the largest company of its kind. Famous not only for his success and wealth, he was equally well known for his generous contribution to society. During the last 18 years of his life, it is estimated that he donated roughly \$350 million to charities, foundations and universities.

B

Another success story of the 19th and 20th centuries was the founder of the Ford Motor Company, Henry Ford. Responsible for manufacturing an automobile which could be afforded by the masses, he made a significant impact on society and became incredibly wealthy. Primarily, his success was achieved by using the 'assembly line' to manufacture his cars. Before this, employees of other manufacturers would work in groups to build one car at a time. The moving assembly line meant that each individual was responsible for a specific job. This division of work allowed cars to be produced more quickly and efficiently. With the addition of the world's first automatic conveyor belt*, it is estimated that Henry Ford's factory was soon producing a car every 93 minutes.

C

Estée Lauder started her own beauty company in 1946. Her business, which includes product lines such as Estée Lauder, MAC Cosmetics and Clinique, has had incredible success.

Born in Queens, New York, in 1908, she started her first beauty company with a skin cream developed by her uncle – a chemist by profession. Recognised as an innovative businesswoman, Lauder became one of the richest self-made women in the world. She believed her success came from producing high-quality products and focusing on excellent customer service.

D

Steve Jobs made his fortune by creating some of the most popular products of all time. Born in 1955 in San Francisco, California, Jobs co-founded Apple Computer with Steve Wozniak in 1976, when Jobs was just 21. The project started in the family garage and together they revolutionised the computer industry with products such as the iPod, iPhone, iPad and Mac.

*assembly line – a line of machines and workers in a factory that a product moves along while it is being built or produced

*conveyor belt – a continuously moving piece of rubber or metal used to transport objects from one place to another

Read this short text and answer the question.

It is commonly believed that taking steps to protect the environment is morally the right thing to do. What is sadly evident, however, is that we all have friends and family who do not concern themselves at all with tackling this problem.

The number one reason for this is that, for some, it is just inconvenient. Other people just do not feel that their contribution makes a difference. Fortunately, however, the majority of us do give it the attention it deserves and many people go to great lengths to ensure the planet is protected for future generations.

Look at the statements and write

YES *if the statement agrees with the views in the text*

NO *if the statement contradicts the view of the writer*

NOT GIVEN *if it is impossible to say what the writer thinks*

- 1 Some people do not pay attention to environmental issues because they do not believe their involvement would make an impact.
- 2 Some people tackle environmental problems in the wrong way.
- 3 Most people do not care about environmental issues.
- 4 Some people do a great deal to protect the environment.
