DOCTORS WITHOUT BORDERS

- I** Doctors Without Borders is an organization that was started in 1971. More than 2,000 doctors from 45 countries volunteer to work in this organization. These doctors help people who need medical help in places that don't have good health care. Today, people all over the world often need this kind of help because of war, disease or other disasters.
- II** The doctors of Doctors Without Borders always take care of anyone who needs medical help anywhere in the world. They do not care about a person's political or religious beliefs. Most of the money for this organization comes from individual people.
- III** Doctors Without Borders also tries to give millions of poor people the drugs they need. These medicines are often very expensive.
- IV** Doctors Without Borders won the Nobel Peace Prize in 1999. The organization got the prize of \$960,000. That money was used to save many lives. Today Doctors without Borders continues to save lives all over the world.
