- ☐ Connects with other devices
- ☐ Earpiece
- ☐ Wi-fi connection

Complete the description of the device with the words in the box.

accessible earpiece swiping  
touch screen bugs  
link up hands-free

The newest version of the glasses has a lot going for it, starting with the fact that it enables users to be completely (1)\_\_\_\_\_. There is no physical interaction with the device, no (2)\_\_\_\_\_ to be splashed with fingerprints. All commands are done either by

voice or by (3)\_\_\_\_\_ with the eyes.

The glasses include the nearly invisible (4)\_\_\_\_\_ that allows you to hear your virtual assistant. The glasses are fully compatible with other devices and easily (5)\_\_\_\_\_ with phones and smart watches. Though we love the functionality and it is a huge upgrade over the previous version, it still has some (6)\_\_\_\_\_ to be worked out, and the price is as yet not (7)\_\_\_\_\_ to most tech consumers. Wait for the next version if you can!
