3. Read and choose the best answer:

Scientists believe that the smart home may be the home of the future. These homes may be of different shapes and sizes. They may also float on water.

Scientists have designed the eco houseboat- a kind of house floating on the sea. But the houseboat is stable and doesn't rock heavily when there are big waves. It makes use of wave and solar energy to move it around and provide power. It also has solar panels on the top of the house to generate electricity, and it can recycle all kinds of household waste.

A robot controls everything in the house and does the housework. In the kitchen, smart refrigerators and dish washers can automatically work by themselves. A smart oven can cook your favorite dishes. All these things and other advances will make our life much better.

1. The eco houseboat will be _____.

- A. in the air B. on the sea C. on big waves

2. The word "stable" in the second paragraph is closest in meaning to _____.

- A. not moving B. comfortable C. peaceful

3. What is special about the kitchen in the houseboat? There is/ are _____.

- A. a robot B. special dishes C. smart equipment

4. Which of the following is NOT true?

- A. Scientists have designed the eco houseboat. B. The eco houseboat can make power. C. The houseboat can't recycle waste.

5. What is the main idea of the passage?

- A. a special kind of house B. generating electricity in the future C. shapes and sizes of houses
