

➤ **Identifying the Place Value of 5-Digit
Numbers-Concept C.W**

▪ **Find The Missing:**

$$1) \underline{\hspace{2cm}} + 90,000 + 600 + 9,000 + 8 = 99,638$$

$$2) \underline{\hspace{2cm}} + 100 + 90 + 4,000 + 8 = 64,198$$

$$3) 20 + 50,000 + 400 + \underline{\hspace{2cm}} + 3 = 56,423$$

$$4) 0 + 0 + 900 + 5,000 + \underline{\hspace{2cm}} = 45,900$$

$$5) 6 + 700 + \underline{\hspace{2cm}} + 10,000 + 70 = 16,776$$

$$6) 2 + 80 + \underline{\hspace{2cm}} + 6,000 + 90,000 = 96,782$$

$$7) 60,000 + 900,000 + \underline{\hspace{2cm}} + 1,000 + 4 + 30 = 961,134$$

$$8) 0 + 40 + 200 + 4,000 + \underline{\hspace{2cm}} + 200,000 = 204,240$$

$$9) 7 + 60 + 500 + 9,000 + 10,000 + \underline{\hspace{2cm}} = 319,567$$

$$10) 1 + 200 + 4,000 + \underline{\hspace{2cm}} + 20 + 900,000 = 954,221$$

$$11) 300,000 + 70,000 + 800 + 2,000 + \underline{\hspace{2cm}} + 7 = 372,857$$

$$12) 600,000 + 70,000 + \underline{\hspace{2cm}} + 5,000 + 70 + 5 = 675,775$$
