It is a database file. It contains data organized into tables and fields and may also include custom forms, SQL queries and other data.

It stores video and audio data encoded in various codecs. It can store high-quality video and audio and typically uses less compression.

It's an audio file saved in a compressed audio format that is commonly used to store audio tracks, podcasts, lectures, sermons and audiobooks

It contains formatted text and may also include images, tables, charts, and other document elements.

Word processing document that may contain formatted text, images, tables, graphs, charts, page formatting and print settings

Used to store web graphics, digital photographs, and images with transparent backgrounds. It is compressed with lossless compression and supports transparency.

It's a template that contains pre-formatted document settings, such as headers, footers, margins, font sizes, and other common page styles.

It's a spreadsheet file. It contains one or more worksheets, which store and display data in a table format. It can also store mathematical functions, charts, styles, and formatting.

It's a slideshow. It is saved as a completed slide show, which can be viewed by PowerPoint, OpenOffice, and several other presentation programs.

It is a presentation file. It contains a collection of slides, including their text, images, formatting, animations, drawn objects, and other media.

It is an editable slide show, It may include formatted text, bullet points, images, movies, sound effects, and music.

Used to store digital photographs and graphics created by image-editing software. It features lossy compression that can reduce the size of an image without much degradation.

It's an executable program you run in Microsoft Windows and contains either Windows applications or application installers. It can also store malware which you should not open unless you trust the file's source.

It's commonly used for saving documents and publications in a standard format that can be viewed on multiple platforms. The files are created from existing documents instead of from scratch.
