

PLANETS IN THE SOLAR SYSTEM

This is the first planet closest to the Sun and the smallest in our solar system.

One day in this planet is longer than one day on Earth.

this planet once believed to be the center of the universe, until it was debunked by Galileo Galilei.

this planet has two moons and is the last of the terrestrial planets along with Mercury, Venus, and Earth.

The Great Red Spot visible in me is a storm that has been going on for at least 350 years. It is massive enough to fit three Earth-sized planets in it.

planet's orbit around the Sun is every 29.4 Earth years

I have the lowest temperature of all the planets, with a minimum atmospheric temperature of -224°C .

One year in this planet is equal to 165 years on Earth .
