Burgers that taste like meat, but have no meat in them, are an amazing idea. Of course, they're also good for the health of both people and the planet. But most of us don't change our eating habits for food that tastes the same. It has to taste better! For example, some people in New York love the Best Burger, made by Dave Simmons, a popular chef. His grilled burger is made of cereal and mushrooms. It doesn't taste like meat, but it is really delicious. What do you think? Is the future of food all about science, or is it about what the customer wants?
