3. Match the emergencies to the first aid actions.

What should you do if ...

... the person is unconscious and not breathing?

Quickly find help.

... the person has a nosebleed?

Do not move or lift the person. Keep them still.

... the person is burnt?

Lean their head forward, then pinch the soft part of their nose.

... the person is choking?

Do not put ice on it. Run cool water over the burn.

... the person has a broken bone?

Slap the person on the back.
