

## EXERCISE 6

Read and listen to the extracts from the recording. Complete the extracts with between one and three words for each gap.

### 1. Reduces the chance of accidents – B

That could be a rock or a large stone or even just a large snowball – and you put it there to remind yourself where \_\_\_\_\_ is. This is so you don't walk on it and \_\_\_\_\_ when you're outside.

### 2. Soft branches are best – H

Um, before you shut yourself inside the \_\_\_\_\_ for the night, do go out and collect some tree branches – branches from fir trees are the best type – as they're \_\_\_\_\_. You can then place these inside the cave, on top of the flat shelf – the one \_\_\_\_\_ of the cave and away from the entrance.

### 3. Piled-up snow adds strength – C

It's a good idea to \_\_\_\_\_ as much snow as possible over the top of your cave – on the outside, I mean, so it's good and thick. And you can see from the diagram that the pile has formed into a \_\_\_\_\_ shape. When the snow \_\_\_\_\_ and becomes really hard, your cave will be less likely to fall in.

**4. Allows air in and smoke out – D**

If your cave is big and wide enough for you to have a small fire inside, of course you'll need to \_\_\_\_\_ out. And if you're inside for the whole night, you'll need to let some air in, too. To do this, you'll need to make some \_\_\_\_\_ .
