

Hi everyone, welcome to our presentation about the solar system.

There are _____ planets in the solar system.

We live on the E_____.

The closest planet to the sun is called M_____, but M_____ is not the hottest planet.

The hottest planet is V_____.

The planets far away from the sun are a lot colder than Earth.

The coldest planet in the solar system is N_____.

It is much colder than Earth and is coloured blue.

Our planet Earth is very big, but it is not as big as some other planets.

The biggest planet is called J_____.

It is bigger than all the other planets, like S_____ and U_____.

Thank you for listening to our presention. We can now answer any questions.
