EARTHQUAKE

safety advice

- A If an overnight earthquake wakes you, don't get up. Trying to move to a safer location is more dangerous than staying under the sheets. For example, broken glass can injure you if you try to go downstairs. Instead, stay where you are and protect your head with a pillow.
- B Stop at the roadside in a safe place. Avoid bridges and locations near trees, damaged buildings and broken power lines. Don't leave your vehicle and don't remove your seat belt. Switch on the radio and listen for advice from the authorities.
- C Don't waste food or water. Major earthquakes can create a shortage of both. If water is still running from the tap, it's a good idea to fill a bathtub. If you are without power, unplug all electrical items to prevent fires when the electricity returns.
