

SENSORY WRITING

When we write a paragraph to describe something, we use describing words (adjectives) to help the readers experience or get the picture of what we describe

In sensory writing, we choose an event or a place and we use describing words (adjectives) to explain what we see, hear, smell, taste, and feel.

sight	colorful, dark, shiny
sound	loud, whispery, screechy
taste	yummy, sweet, sour
touch	soft, rough, smooth
smell	fresh and clean, like flowers, like burnt toast

Now, your turn to make a descriptive paragraph about your experience joining night festival or the same kind of event. Tell what you see, hear, taste, touch and smell in your paragraph.
