- a Read the article once. What does the article say is the best exercise for all body types?

What is the best sport for your body type?

Just because someone has dreamt of playing football from childhood does not mean it is the best sport for him or her. Finding the sport your body is best suited to can make a big difference to how much you enjoy it and how good at it you are.

A person with an **ectomorph** body type is tall and slim with little fat or muscle. This person has narrow shoulders, chest, and hips, and thin arms and legs. Ectomorphs have difficulty putting on weight because of a fast metabolism.¹ What suits ectomorphs is endurance sports. Marathon running, swimming, and football are excellent choices for them.² Basketball may also be a great option. Ectomorphs also generally do well in gymnastics.

Mesomorph body types are the stereotypical image of an athlete.³ Mesomorphs can put on or lose weight easily and build muscle quickly.⁴ Possibilities range from weightlifting and boxing to athletic sprinting and cycling for shorter distances.

A person who is an **endomorph** naturally carries more body fat.⁵ They are often short, with a high waist, and well developed upper arms and thighs. While it may seem that an endomorph will not be very athletic, they can be very good at power sports because of their larger mass.⁶ but strength activities like wrestling, discus-throwing, or power-lifting can be a great fit.

A few extra considerations

It is important to note that the three body types are extremes. No one is 100% ectomorph or completely endomorph.⁷ Another key point is that diet and environment also contribute to athletic ability and genetics plays a large part. And the most important thing is to choose a sport you enjoy. The best exercise of all is the one that you will do!
