- ② However, a recent study tells us that men and women really do think differently. Our brains are built differently. The results of the study suggest that men have better spatial perception (driving, sports), while women's brains equip them better for remembering words and speaking fluently.
- ③ The scientists examined only a small part of the brain, and they say that further research needs to be done. Here at *chatzone1*, we have done some less scientific research. We asked people, "What are the differences between the sexes?" Here are their answers.
