

IT WORDS WITH P

8. Decide if these words are used correctly or not. If they are not, rewrite the sentence → all the words you need are written down in these sentences. Capital letters and punctuation matter!

① That function takes two parameters.

② Lisp-like programming languages use a lot of performance in their syntax.

③ That parenthesis takes two arguments.

④ I wrote a program that keeps track of my to-do list.

⑤ From the perspective of the user, prioritizing is primarily about less execution time.

⑥ She came to us with a full procedure for her product.

⑦ The main difficulty we face when time-managing is correctly planning the tasks assigned to us.
