Answer the questions below correctly!!!

1. Mr. Harry will buy a wristwatch for Rp. 4.000.000,00. Because the store is giving discounts on all the wristwatch models it sells, Harry only needs to pay Rp. 2.800.000,00. How much discount does the store give?

2. Emily bought a bag for Rp. 2,000,000.00. If the tax given from the purchase of bag is 10%, what price must be paid by Emily?

Rp.

3. Mr. Arnold is going to buy rice to stock up at his shop which has run out. He bought 5 tons of rice at a price of Rp. 40,000,000.00. Initially the rice was sold at a price of Rp. 10,000.00 per kilogram and sold 3.5 tons in the first and second weeks. To prevent damage to the rice from being stored for a long time, Mr. Arnold reduced the price of his rice to Rp. 6,000.00 per Kilogram unit. If all that was sold out, How much profit or loss did Mr. Arnold get?

4. What is the percentage of profit from the sale of dress purchased with an initial price of Rp. 1.000.000,00 and will be resell at a price Rp. 1.750.000?

5. Mr. Edward bought a house for Rp. 500,000,000.00. Due to the bad home environment, Mr. Edward decided to resell his house for Rp. 4,500,000.00. What is the percentage loss from the sale of the house?
