A. Order the statements.

Steps for Jumping a Car Battery

Attach each red end of the cable to the positive terminal of each battery.

Start the car in order to send a flow of electricity to the dead battery.

Make sure the cars don't touch each other.

Take off the cables in the opposite order you put them on.

Turn off all electrical power before you begin.

Allow the battery that is recharging to run for a while.

Attach the negative cable to the negative terminal of the good battery.

Attach the other end of the negative cable to a paint-free metallic surface on the car with the non-functioning or dead battery.
