SQUARES

Do these problems, don´t forget to write the data of the squares in the white rectangles ( ) , and m (metres) or cm (centimetres) in the solutions:

1. Dani has a square garden with 8 metres of length. Find the perimeter of the garden.

2. Maria´s square house is 25 metres of length. What is the perimeter of her house?

3. Yesterday, I bought a square table. It has 252 cm of perimeter. Find the length of my table.
